EDUCATION

University of Michigan

Master of Science in Product Management

Ann Arbor, MI

Expected May 2028

Bachelor of Science in Information (UX Design)

Expected May 2027

Minor in Computer Science and Entrepreneurship

- **Related Coursework:** Machine Learning, Human-Computer Interaction, Introduction to XR Application Design, Advanced Coding in Java, Advanced Product Design, Financial Accounting, Business Fundamentals

WORK EXPERIENCE

Warmilu (Medical device startup improving neonatal warming)

Jun 2026 - Aug 2026

Product Management Intern

Remote

- Boosted **direct sale conversion by 20%** by directing the redesign from user research through launch on Figma and Squarespace, defining requirements cross-functionally before shipping the updated platform
- Cut **internal triage time by 40%** and increased qualified inquiry conversions by 18% by restructuring partner intake pipelines and navigation architecture through automated purpose-driven routing
- Executed Minimum Viable Product (MVP) roadmap priorities across Agile sprints, running A/B multivariate tests and iterating quickly on drop-off funnels to optimize feature performance

Luxshare (Global electronics manufacturer supplying Apple and EV industries)

Jun 2025 - Aug 2025

Product Management Intern

Shenzhen, China

- Increased **production accuracy to 98%** by authoring Product Requirement Documents (PRDs), assembly-line workflows, and architectural blueprints from 15+ stakeholder interviews across hardware-software integration
- Synthesized **200+ technical audits** and reduced operator training errors by 30% to resolve manufacturing edge cases, standardizing Quality Assurance (QA) protocols
- Reduced 18% rescheduling for 1,000+ daily tasks with performance analytics dashboards using Python and Excel

PROJECTS & LEADERSHIP

SomaSeek (Multi-robot Embodied Intelligence Platform) | Product Manager

Jun 2025 - Aug 2025

- Accomplished **40% pilot adoption growth** by architecting LLM prompt-grounding and few-shot rubrics that eliminated hallucinations in SomaSeek's grading AI, demoed at China's Big Data Expo 2025 to 1.5M+ viewers
- Accomplished **25% sprint efficiency gain**, as measured by cycle time, by building telemetry dashboards tracking 10+ post-launch engagement signals to drive data-informed backlog prioritization
- Sustained 95%+ educator trust using by defining Responsible AI guardrails and review workflows

Afterlife Club (AI-Powered Life Journaling App) | Co-Founder

May 2026 - Current

- Accomplished 88% prototype task completion rate by pivoting core product framing from death-centric planning to daily memory journaling after user and market research revealed emotional friction
- Maintained a 92% user trust rating cross functionally by architecting ethical AI data boundaries that banned synthetic voice-cloning while preserving generative reflection prompts
- Owned 0-to-1 product strategy, wireframing, and feature scoping across Engineering, Marketing, Legal, and UX, shipping a functional V1 prototype ahead of public launch

Startup Career Fair (Biggest official career fair for Michigan startups) | Director

Sep 2025 - Mar 2026

- Led an 11-member cross-functional team to connect 300+ students with 70+ startups, scaling Michigan's largest startup career fair across two campuses
- Drove \$3,000 in corporate sponsorship and 6 key partnerships, including Red Bull and Ross School of Business, leading external outreach campaigns that bridged university and industry stakeholders

SKILLS AND OTHERS

Technical: Python, Java, C++, SQL, HTML/CSS, Git, Machine Learning (LLMs, NLP), Tableau, Google Analytics, Figma

Product: User Research, Go-to-Market, Design System Strategy, MVP Roadmapping, PRD Authoring, A/B Testing

Campus Involvements: Teaching Assistant (SI 201: Data-Oriented Programming, 30+ students), Vice President of Projects (Product Motion), Tech Consultant, Entrepreneurship Minor Peer Advisor
